

TYLER ALTERIO

1 Rockland Terrace - Natick, MA • (508)-314-9756 • Tyler.Alterio@student.uml.edu • GitHub ID: tyalt1

Education

University of Massachusetts Lowell - Anticipated Graduation Fall 2016

B.S. Electrical Engineering and B.S. Computer Science

GPA: 3.47

Dean's List All Semesters

Professional Work Experience

University of Massachusetts • Lowell, MA

January 2016 to Present

Computing 2 Grader

- Tutored students in computer science basics and data structures.

University of Massachusetts • Lowell, MA

August 2015 to December 2015

Research Assistant

- Experimented with P4, an open-source domain-specific network description language.
- Develop method to compile P4 behavioral model into CUDA implementation.

Philips Color Kinetics • Burlington, MA

June 2014 to January 2015

Firmware Engineer Co-Op

- Practical use of Git version control and tools. In addition to Github management.
 - Implemented new features in firmware of PIC based devices with MPLAB IDE.
 - Created command-line utility in Qt framework to interface with fixtures via UDP.
 - Worked with team of 8 software engineers, utilizing Agile Scrum workflow.
-

Skills

Languages

- *General:* C, C++
- *Object-Oriented:* Java
- *Scripting:* Python, Perl
- *Shell:* Bash, PowerShell
- *Functional:* Clojure
- *Numerical:* MATLAB

Software

- *Operating Systems:* Windows (up to 10), Linux (Debian-based)
 - *IDEs:* Visual Studio, Qt Creator, IntelliJ, PyCharm
 - *Version Control:* Git
 - *Hardware:* Arduino, Raspberry Pi
 - *Lab Equipment:* Oscilloscope, Multimeter, Soldering Iron
-

Relevant Course Work

- Intro to Engineering 2: MATLAB application and use of BASIC STAMP microcontrollers.
 - Computing 4: Adoption of OpenCV computer vision library and Qt libraries for C++.
 - Microprocessor System Design: Program design in x86 and PIC assembly.
-
